We love Kim Kardashian because she has booty so big we can't even believe our eyes, so when we were asked to calculate how much her waistline costs us in dollars, we got curious and looked into it. We figured out that Kim Kardashian's waist line costs around \$10 million per year, and that's just the cost of her waistline! When you look at Kim Kardashian's waist, the first thing that pops into your mind is her booty, but does her big booty cost her anything? According to Bridget Moynahan, star of The More You Know, the answer is no. Bridget does a comparison of other celebrities in Hollywood to find the average waist size for males and females, and by looking at these figures it's not hard to figure out why Kim Kardashian is the trend setter. While the ladies with the smallest waists are Jennifer Aniston and Jessica Simpson, the guys with the smallest waists are Brad Pitt and Ryan Reynolds. According to Moynahan, the waist size of celebrity men and women seems to follow a pattern. "Women tend to be larger than men at the top," Moynahan said. "From Jennifer Aniston to Britney Spears to Angelina Jolie, it's almost a constant - they tend to be larger." While many of these ladies are in Hollywood and have stylists helping them dress to perfection, they all can't dress themselves for \$10 million.

On the other hand, Kim Kardashian is pretty sure to look stunning in anything she wears. According to Moynahan, one of the reasons why men and women have varying waist sizes is the body type of their parents. Moynahan said, "I was talking to Ryan Reynolds, and he says his father's parents were the size of the male actors he's surrounded by now. When he was a little boy, his father's parents were huge. So, [he says] if you look at Ryan Reynolds, he says, 'I look like my father a1d647c40b
