Desksense Home Crack For PC

[Download](#)

Unique home security application for users who desire to keep their files and personal data safe and secure at home or even at office. At the same time it provides excellent security measures as it keeps track of who tries to enter the home or office. It can be used for various security purposes like password protecting your files and folders, blocking malwares and unwanted websites and even blocking external devices like computers, mobile phones, tablets etc. Desksense Home screenshots : Users will be able to set a password for each folder. The passwords can be set to be either date or time-dependent. You can set the time to be 24 hours or 1 day, 1 week or 1 month. A user or any other system with admin privileges can reset the password or unlock the folder and view the files and folders in there. You can set it to be either date or time-dependent, and can be set for 24 hours, 1 week or 1 month. Desksense Home Features: Desksense Home is a unique password-protecting tool for home users that can be used as a security solution against people who may wish to access the files and folders of the home user. This helps you to keep your files and personal data safe from cyber attacks and other kinds of mischievous activities of others. It provides you with some extra safety as you will be able to block unwanted people who try to access your files, folders and other things in your home or office. In addition to that it provides a robust security mechanism as it allows you to set a password on a folder that is protected by it. The user and the system administrator are allowed to reset the password or to unlock the folder in case the user forgets the password. The application can also be used to keep track of who tries to access your computer, files or folders. Desksense Home allows you to set a password on a folder, keeping track of the people who have tried to access that folder and block them if they fail to enter the correct password. Desksense Home screenshot: This tool will enable you to protect your files and folders with a password of your choice. It will password protect your home files and folders. It will also lock the doors and keep away any unwanted people from accessing the contents of your files and folders. You can set the time period for which the password will work. You can also select to add a password of your choice for the folders. This will enable you to
