-- Record all your keystrokes, passwords, clipboard activity and more -- Run programs in stealth mode, so that you can monitor the Internet without being detected -- Windows 2000/XP/Vista/7 -- It runs in less than 5 MB of memory -- Supports all languages (English, Italian, Spanish, French and German) -- Works with every computer Unicode widgets for OS X 1.2.3 + (30-50% Faster) Updated to work with the latest Xcode and Xcode 3.1. Xcode 3.1 is required to use this package. Now includes support for Unicode widgets! Unicode widgets enable you to create macOS-style widgets using any language, including Chinese, Japanese, Arabic, or Punjabi. *Faster* Add a new "Unicode" keyword to the end of the application key in the application's Info.plist file. Selecting "Unicode" will disable the language icons and allow you to choose Chinese, Japanese, Arabic, or Punjabi as the widgets' language. The new widget size is also larger than the old widget sizes. Are You a Mac Game Developer? If you are a Mac game developer, you need to make money. This is an ever-growing area.
