PDF Count Pages and Words In Multiple Files Software Cracked Accounts is a neat application that will let you perform page, word, character, paragraph, and line counts all from within the same windows. An easy to use application The app's GUI is pretty straightforward, although the way the buttons are arranged, fonts used and color scheme are a bit lacking and give off an overall disorganized feel to it. The controls

are pretty simple and self-explanatory, as all you have to do is browse for the PDF files you need via the "Add PDF File(s)" button, wait a few seconds for the app do process and do the counting and you are done. If you're first testing this app to see how it functions, the developer provides with some sample files so that you can get the hang of it. An app that does fast processing Each app's scanning takes a few seconds so you no longer need any online tools that can perform wordcounts for

example. PDF Count Pages and Words In Multiple Files Software also supports batch processing, meaning that you can perform the counting on multiple PDF files in one single cycle. It goes without saying that the scanning process increases additively the more files you add to the query. After the scanning is done, the results are shown in a table-like manner in one single user. Unfortunately, the UI is not arranged very, as despite the Window being very wide, the results page still has to be scrolled.

This happens especially if you choose to perform a search for all properties. The width of each result's column is unnecessarily wide, resulting in a lot of wasted window space. A simple app to have for your PDF files If you're for example during the exam periods and you need to submit a 2000 words essay, then you might need PDF Count Pages and Words In Multiple Files Software to see whether you're above or below that requirement threshold.
