A game of "twists and turns" where the players can create their own path with all the possibilities. You can make your dog jump and climb, fall into walls, items and surroundings; avoid obstacles; die in a pitfall; catch a ball; get caught in a wire and more... all in a 3D environment! The Game The game is pure point-and-click, and the task of the players is to guide their dogs from one point to the next. The game is made in PIXELART, it uses Moai engine and it has enchantments which can't be missed! All of that keeps you immersed for hours and hours. I hope you'll agree with us, because that's one of the reasons why we started making this project. The Story: In a scientific village it seems to be always a research dog who comes across a scientific experiment. There's a scientific experiment for each "research dog". All the dogs must find their special key, to open their special door, and they will then discover a world of wonderfull discoveries just waiting for them! You can watch a trailer of the game here : www.youtube.com The Update-Logs: v1.4 2015-05-26: Added invisible walls; Added more options to the player character; Added more experimental doors; Added three different scenarios to be played by the game; Big updates to the level editor! And more! v1.3 2015-05-11: Added the main level's tutorial; Added invisible walls; Added a new scenario; Added the possibility to play the level in "one player" mode; Changed some paths; Big updates to the level editor: Added a first scenario; Added a new experimental door; Changed the player path; Added a tutorial for the level editor; Added the possibility to create a level using the level editor without the Moai editor; Big update to the level editor: Added a new experimental door; Changed the player path; Added a tutorial

[The Dungeon Slayer: [Feel free to join in, we'd love to have a good group for our campaign. ~~~ babby What time zones do you all play in? ~~~ aaronblohowiak The nights are 1-3 EST, with multiple people playing in the middle or late evening. It can be slow to log in, but we tend to roll a lot of dungeoneering in the morning. ----- bananas Have played WoW a few times, EVE - a lot, and also plenty of D&D. Looking for a couple of good campaigns that can run on Skype/Twilio. ~~~ saraid216 I would recommend Dogfight Dailies on WoW. It's a fun game that is a lot of fun to play with friends (at least for me), and I don't think it'd be too hard to adapt the format. There's a certain genre of indie games that are primarily strategy games, and they tend to be text-heavy. ~~~ babby I've been having a lot of fun with it on Skype/Twilio. It's kinda scary that it's so easy to make in real life. ----- saraid216 There's this thing called "Dungeon World." It's a GMless RPG written by a programmer and published under an open license. [world.sourceforge.net/dw2/dw2.html](world.sourceforge.net/dw2/dw2.html) I know it's got some odd rules, but I find it to be very interesting. The _sort of_ rules are not terribly important to my enjoyment, but it's an interesting break from the norm. ----- rner

What's new:

The Horses and Girls Soundtrack is the name given to several releasing by Mr. Bungle. The song "Fistful of Love" is a tribute to lead singer John Pantry. Bungle only recorded a few demos for a Horse and Girls soundtrack, and all the songs were done by a short lived group called The Hub City Suckers. Most of the songs are found on the Bungle in Yarn EP. What isn't found on that EP are approximately 20 tracks that were eventually be released on two full length discs of the same name. The track "The Sabre Toothed Grin" is an unreleased song. The songs listed below are the known Horse and Girls Songs minus the Hub City Suckers songs. Epilepsy is often associated with abnormalities of brain chemical mediators, such as gamma-aminobutyric acid (GABA). One of the major mechanisms of action of antiepileptic drugs (AEDs) is antagonism of GABA-mediated neurotransmission. Levetiracetam (LEV), a novel AED, is unique in that it preferentially increases synaptic GABA levels. However, the mechanism(s) of LEV action are still unclear. We investigated whether LEV affects the intracellular distribution of GABA in the rat brain using tissue fractionation techniques. The CSF/superficial and deep cerebellar cortical and spinal cord levels of GABA were compared between the LEV-treated, saline-treated, and controls. The LEV-treated group had significantly higher CSF GABA levels than both the saline- and control groups in the cerebellum and hippocampus, whereas the extracellular GABA levels in the LEV-treated group were significantly decreased compared with
