What really sets Skin Maker apart is its capability to streamline the process of skin creation. You can basically preview the skins you are building without having to risk any changes. You can also preview how the skins look with the drop-down menu. Additionally, as you add objects to the design, you can freely hide and unhide them, which makes it easier to identify and replace them. Furthermore, Skin Maker allows you to create different versions and visualize them in a side by side comparison. You can export skins in the PFM file format, which is simpler than the PSD and you can even create skins in several document formats. Top features: Builds skins for AIMP Drag and drop functionality Previews the skins you build Preview PSD skins you build Export skins in PSD, PFM, WDS and WDSx formats Ability to create skins with a custom interface Summary of Builder: Builder is a powerful software that allows you to design, build and export skins for the popular multimedia player, AIMP. You can create skins in PFM format, which is simpler and easier to edit than the PSD. Plus, you can even create skins in another file format, such as WDS or WDSX. Moreover, you can export skins in the three formats mentioned above. Design GUI elements Builder has a very straightforward process that allows you to design, build, preview and export skins for the media player. It allows you to drag and drop elements that appear as a series of buttons, menus, buttons, text boxes, spectrum display, waveform display, gauge and highlights for the different types of themes, projector presets and container skins. Save the software's design preferences, either as presets, skin folders or components, by right-clicking on them in the main interface. Moreover, you can edit your design through a magnifier tool, which makes it easier to identify the individual elements and their properties. Multi-purpose application Builder can be used as a standalone software, but it also works when you have the AIMP and the AIMP-FileManager installed, which makes it easier to utilize its capabilities. Moreover, you can also use it to design graphics for any software you may have. Program features: Skin browser Drag and drop functionality Preview projects you build Drag and drop technology The software you will be asked to install automatically when you

This is a simple, customizable music player designed to help you enjoy the soundtracks of games with tracks stored on your computer. You can modify the game sounds by selecting the source of the audio files. If you want to make it as if the music is playing in the game, you can enjoy the soundtrack of the game even when playing. The application extracts the tracks from previously created playlists. What's more, you can also use your songs or your own playlists for this player. Intuitive interface and customization options First of all, the application takes its cues from the kind of soundtracks you may hear while playing through the game. The left side of the interface shows the wave form, and the right side highlights the filename and track. It also gives you a layout for the file structure as well as the option of previewing the music and switching between looping and playing modes. To change the game soundtrack as the music mood changes, you are granted the ability to enhance the customization options. From up, down, left and right, you can adjust the volume for each song, as well as change it from the default to the "normal" and "mute" options. Furthermore, you can change the currently selected song and choose one of the other songs. A tool that helps you to customize the game audio files The program can also organize your music files into playlists, which can then be saved in the application's own directory. Moreover, you are given the option to import your playlists from your iTunes account, as well as save playlists from there as well. The track player is a good option for users who want to transfer their favorite game's songs to their PC.
