If true, this technology could be fascinating, and it could also be used to study movement of players (particularly young players, and especially female soccer players) in action. This technology could also be used to study the impact of injuries in younger soccer players. This technology could also be used as an online training tool. Ben I was wondering if you might like to do that? Rgds, Francis

As the #1 selling video game franchise of all time, FIFA is the world's premier soccer franchise. Millions of fans tune in to FIFA Ultimate Team™ to collect, play and compete with football superstars from more than 20 of the world's top soccer nations. FIFA mobile games deliver the joy of footy on the go. FIFA IS more than just a sport. FIFA is a way of life, a community. FIFA is the most passionately played and supported international sports franchise in the world. FIFA is home. The year is 1992. For the first time ever, football is presented in a brand new authentic way through a revolutionary gameplay revolution. Work your way up the Men's National Team ladder, join a Pro Club, become a Legend. Experience iconic locations from around the world and share the game with millions of other fans. All the excitement, atmosphere and drama of football come to life like never before through authentic and dynamic gameplay. Create Your Player and live out your Dreams. Developed by the creators of FIFA 19. FIFA is football on a larger scale. It's your responsibility as a player to make sure it becomes your future. Your future. Gameplay advances: Thanks to all the feedback from fans, clubs and our PES Pro Clubs members, we have a more authentic and dynamic FIFA experience than ever before. Improved iteration speed: Tweaks and adjustments have been made to the game's AI to make it easier for players to build-up their game. More live shots and goalkeepers helps to speed up play and improve match quality. More attacking opportunities: The game has been made even more tactical, with more emphasis being placed on the midfield, to give players more attacking opportunities. When attacking from close range, goalkeepers have more chance to make saves. The offside system has been refined and refocused: When a defender is offside during an attack, the defender receives a yellow card and will be marked by the referee during a subsequent free kick. This works to keep players onside by forcing defenders to position themselves closer to the player who's receiving the ball. Team AI & tactics: Teams will make more forward runs and advanced runs to open up passing lanes and get into better positions for the next pass. Having multiple attackers in one space can help to open up passing lanes or free your forward onside when they bc9d6d6daa
