This game was developed as a student project at DigiPen Institute of Technology and was created for educational purposes only. Please check out our publisher page for more information. A World where the World is Latin In the game world of Sightbringer, there are two kind of creatures. The surface world is populated by people. They were living a peaceful life until the great calamity happened. They were taken away by the dark energy to this dungeon world where the monsters are. The monsters do not see the existence of the people. When you are in the dungeon world, you are playing as Sight, a brave and strong person who was sent by the people to stop the calamity from happening again. You are so close to saving the people and getting home. However you need to achieve and complete your mission in order to defeat the monsters and get back to the safe and peaceful world. You must traverse three underground levels, each with its own obstacles and puzzles. You can use the fire in the brazier to get into and out of the dark energy. Through the levels and their obstacles you collect three unique ancient artifacts which can be used to earn an advantage over the monsters along your journey. You need to clear the dungeons in order to get the power back in the brazier which will make sure the fire will be lit again. Like in Minecraft, you can bring in the blocks and move them around, but the game isn't just about exploring all around and finding them. Unlike in Minecraft, the

environment in Sightbringer makes sure that once you find a block it can't get you back to the dark energy. You will also find and use a whole bunch of tiles which can help you navigate in the different terrains. Features 3 unique ancient artifacts with different effects Local High Score system 4 bosses Music by Cicada Atrocity A game for the beginners and the experienced players alike A Game with a Lot of Replayability - but Not so difficult Dynamic lighting with day and night cycle Full tile mapping with the use of the unlit tiles Full support for high resolutions on all modern devices like modern computers, tablets and mobile phones Full Windows and MAC Support About The Game Latin Simulator: A World where the World is Latin Sightbringer is a single player platform

This game is no way to easy, just because of the theme and the starting level. The game itself is very easy to play, but actually escaping from the ship is very hard. And that is why I call it Shipwreck Escape, because it's not only play on a ship but escaping from a ship! ☆ Gameplay ***** In the PS4 (or PC) version, look at the control panel in the bottom right corner of the screen to see your weapons and upgrades.
