Renowned story-tellers WYW and BN-GAGA (Director) reveal a new game: Kingdom Conquest's third game! The essence of the Kingdom Conquest series is expressed in the motto "Play the Real-time Strategy Game you've always dreamed of"! As in previous Kingdom Conquest games, you will be able to challenge your friends with the "Battle Royale" feature! The "Real-time Strategy Battle" feature lets you play with up to three friends on one device in a time limit of 30-60 seconds, every second is crucial! Matchmaking is now possible between the "Real-time Strategy Battle" and other modes (story, versus, and arcade). In the Arcade Mode, you can experience the thrill of 'if you choose to win or lose' in one-on-one matches. The Story Mode offers a so-called "24 hours of history", since it lets you play on it as long as you want. When you clear a level, a bonus which is given depending on the location (level) will be collected. The additional bonus and items collected can be used in the "Real-time Strategy Battle" to weaken your opponents! There are two modes for victory in the "Real-time Strategy Battle". In the "Quick Play" mode, no time limit is set. In the "Real Time" mode, the map moves automatically at the end of the second round in every second. You can check the outcome of your battle in the "Real-time Strategy Battle" mode after the completion of the story dungeon, "A Maze-like Garden". The "Maze-like Garden" dungeon is available as a pre-load now! This game was made by me, Mitch, using the Construct2/3D engine. This game was made using my time at the Videogame school. This game is made by me and has no names or addresses of known companies in it. This game is made for fun. This game uses the Construct2 Engine for both the character and background designs, but is made with a purpose for others to use as a "template". Here are some related Links: Code: Songs: Onward by Prontori Frozen Fire by GhostIntoTheFire Licence: I have not asked for this licence because it limits the use of the game too much, but if you wish to use this game for anything, please contact me and I'll give you the information you require. Music and Permissions: Onward by Prontori Licence: I have not asked for this licence because it limits the use of the game too much, but if you wish to use this game for anything, please contact me and I'll give you the information you require. Music and Permissions: Frozen Fire by GhostIntoTheFire A: Deconstruct2, a very widely used C++ 3D programming engine. See the website A: I just found a game using Construct 2, but this is written in Flash. Comments This is a top-down platformer, but with elements of retro games such as Super Mario Bros. because the developer used the arcade controller to keep the player in the game. The controls are very responsive, and make the game playable with a controller. Also, there are many different armors to choose from. The game lacks variety in levels as there are not many, and many are reused. While playing, I had some difficulty dodging enemies who seemed to be immune to attack. The game lacks a tutorial.
