The first option to explore is "Select" on the left. You can choose items in the image like the type of photo you'd like to edit. Once selected you can crop the image (including changing the dimensions – it's a great way to get rid of unwanted background items, like the aforementioned tripod or bothersome flower), move it and re-size it. You can also change the brightness and contrast of the image. The next option is "Enhance" on the left. You can apply a filter to your image. There are many different filters to choose from, including blurring, sharpening and adding borders around the image. You can also add frames and "layers" to an image. 05a79cecff
