I have received this and I am taking the customer service route. Was hoping to get the game fixed under the refund case. Bad experience from the outset. Paying for EA to just install on PC to run the game rather than the disc.

We are already finished with the game. Installed the game, 3.5 hours playing without issues. At about 3 hours in, every aspect of the game would glitch and not respond. If you click on a player to build a team, or register a transfer or tutorial, the glitch can still be triggered. Such as checking the "apply" button on a transfer. If your monitor isnt calibrated, you will get a flickery screen and the team bed sheet won't load. Would suggest shutting it all down before playing, disconnecting the internet if you are stupid enough to connect to the internet for updates. Closed it down and the joystick works fine. No idea what the problem is, hopefully EA will fix this issue.

In conclusion, the game works, beause its based off 20 and people decide to give it a new spin, that doesn't mean EA should offer you a key that gives you access to a game and where people are stupid enough to be downloading it when they should be farming for servers to enjoy the game.
