Field of the Invention The present invention relates to a medical device and an irradiation method of a luminous plasma. 2. Description of the Related Art The introduction of minimally invasive medicine has marked a revolutionary change in the field of surgery. In an operation through a small incision, called laparoscopic surgery, there are many advantages in that bleeding is lightened, the pain is lessened, the wound becomes slight, the cure is high, and so on. While adopting the laparoscopic surgery, a surgical device is required which has a high degree of stability and does not adversely affect the living tissue. In general, using a device having a rotating tool, it is difficult to operate a distal end of the device in a deep region of the human body. In addition, a region in which the device is inserted is limited depending on the diameter of the device
