A: Looks like it's working... Try restarting the browser you're using

Q: How to change left to right alignment in datagridview when binding a sqldatasource

Can any one tell me how to change the left to right alignment of a datagridview while binding a sqldatasource?

```
private void
dataGridView1_CellPainting(object sender,
DataGridViewCellPaintingEventArgs e) { if
(e.ColumnIndex==1) {
e.PaintBackground(e.CellBounds, true); e.Handled =
true; if (e.Value == true)
e.PaintBackground(e.CellBounds, true); else
e.PaintBackground(e.CellBounds, false); return; } }
```

Here, `e.PaintBackground(e.CellBounds, false)` is working fine and we are getting the left to right alignment. But when I am using return statement, I am getting the blank space in the left. I know I can give it an X valuse but it will change the alignment, not the grid.

A: I hope you have verified the values using debugger Just do like this

```
if (e.Value == true)
e.PaintBackground(e.CellBounds, true); else
e.PaintBackground(e.CellBounds, false); //Use code
below e.PaintContent(e.CellBounds);
e.PaintBackground(e.CellBounds, true); e.Handled =
true; // e.PaintBackground(e.CellBounds, true);
//optional
```

Q: Convex Structures on a Vector Space

As an exercise, I've been asked to prove that if V is a finite-dimensional vector space, and T
